

Did you know we have the smallest footprint?

## By choosing RentAir Offshore's Containerised Zone II Air Compressors you'll optimise your deck utilisation...

...because we designed our Containerised Zone II Air Compressors with the industry's smallest footprint and easy operation in mind. This helps minimise deck space requirements whilst maximising production and increasing safety offshore.

### How do RentAir Offshore's Zone II compressors shape up?

- Small footprint (13' x 7'4") = optimised deck space
- Double stacking = optimised deck space
- Internal access hatch = no scaffolding = optimised deck space
- Internal access hatch = enhanced safety and protection for personnel

**RentAir Offshore has a range of Containerised Zone II Air Compressors** from 875cfm / 150PSI, 900cfm / 200PSI and 1000cfm / 150PSI

Not only the smallest footprint in the industry, but you can "stack" and access internally from one compressor to the other...further optimising deck space.

Our containerised Zone II product range complies with Zone II hazardous area flameproof specification. They are fully ATEX approved and certified to DNV 2.7-1 lifting specification. They are uniquely designed to provide operating personnel with the ability to access and operate upper level units when stacked from within the unit through internal access hatches.

This fully internal design provides enhanced protection and safety for operating personnel whilst eliminating requirements for scaffolding which further reduces the encroachment on deck space.
